

CHRISTOPHER VIENRY R. OMANIA

Junior Full-Stack Developer | React · Laravel · TypeScript · PostgreSQL

Angeles City, Pampanga, Philippines · 0936-228-0260 · vienryomania@gmail.com

GitHub: github.com/vien-io

PROFILE

Junior full-stack developer with experience building web, mobile, and enterprise applications using React, Laravel, TypeScript, PostgreSQL, and Kotlin. Experienced in designing relational databases, RESTful APIs, authentication systems, offline-first applications, and interactive 3D web experiences. Comfortable translating business requirements into maintainable technical solutions and collaborating across the software development lifecycle.

EXPERIENCE

Project Lead · Full-Stack Developer · C8nnect IT Solutions

2026 (Practicum) Philippines

Padrellos Procurement & Cash-flow Monitoring System

- Led client meetings, translated business requirements into system architecture, and designed the database schema for a multi-module enterprise procurement platform.
- Served as OJT lead developer, coordinating task distribution, technical alignment, and full-stack implementation across the development team.
- Developed financial reporting APIs and dashboards using complex PostgreSQL aggregations, delivering Excel export for operational and management reporting.
- Implemented role-based access control (RBAC) with dynamic UI rendering and protected API authorization.
- Designed and implemented end-to-end procurement workflows covering purchase orders, delivery tracking, and approval processes for enterprise operations.
- Designed a scalable React frontend using reusable components and custom hooks.
- Implemented Axios interceptors and secure JWT authentication with refresh token rotation.
- Developed the expense management module using a service-repository architecture with validation and maintainable business logic separation.
- Developed auto-generated reference numbering system (LE-XXX) using last-record lookup logic
- Participated in code reviews ensuring consistency with system design and API standards
- Collaborated in Agile-style sprint cycles for iterative feature delivery

Full-Stack Developer · Academic Thesis Project

2023 – 2025 City College of Angeles

LOTMATCH — Web-Based Property Management & Forecasting System with Interactive 3D Mapping

- Architected the application and relational database for a full-stack real estate analytics platform managing 1,930+ properties across 37 subdivision blocks.
- Designed an asynchronous AI pipeline using Laravel Queues that chained sentiment analysis, EMA forecasting, and GPT-generated summaries with near real-time frontend updates.
- Built a multi-stage AI summarization pipeline using OpenAI GPT, caching summaries, forecasts, and sentiment data to reduce API usage and improve response times.
- Engineered a Three.js rendering system using InstancedMesh, raycasting, and performance optimizations to visualize nearly 2,000 interactive properties.
- Containerized and deployed the application using Docker and Render with automated environment configuration and production-ready services.

Demo: lot-match.onrender.com.

Android Developer · Personal Project

2026

Winners — Offline-First Church Attendance Management System

- Developed an offline-first Android application for attendance tracking and member management using Kotlin and Jetpack Compose.
- Implemented MVVM architecture with the Repository pattern, Room, Coroutines, Flow, and StateFlow.
- Built automatic background synchronization using WorkManager and Supabase for reliable multi-device data synchronization.
- Developed attendance sessions, session locking, search and filtering, member management, attendance history, and JSON backup/restore.
- Designed a dual-key data model (SQLite IDs + UUID mapping) for efficient local storage and cloud synchronization.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, PHP, Python, SQL
Frontend	React, Tailwind CSS, Chart.js, Three.js, Vite
Backend	Laravel, Express.js, RESTful APIs, JWT Authentication, Laravel Queues, Background Jobs
Databases	PostgreSQL, MySQL, MariaDB, Drizzle ORM
Database Engineering	Relational Schema Design, ERD Modeling, SQL Aggregation, Migrations, Seeders, Query Optimization
DevOps	Docker, Apache, Render, Git, Bash, Arch Linux
Mobile	Android, Jetpack Compose, Room, WorkManager
Other	Blender, UI/UX, Postman

CERTIFICATIONS

- Cisco CCNA: Introduction to Networks — Issued Feb 2024
- Cisco CCNA v7: Switching, Routing, and Wireless Essentials — Issued Jan 2025

ACTIVITIES & INVOLVEMENT

Presenter / Demonstrator · Software Freedom Day — City College of Angeles

- Delivered a technical talk introducing Arch Linux and open-source software principles to an audience of students and faculty.
- Demonstrated Arch Linux workflows, package management, and development environment setup through live demos and technical Q&A.

EDUCATION

Bachelor of Science in Computer Science

City College of Angeles — Angeles City, Philippines · 2022-2026

DOST Scholar (2020 – 2021)
